

Anaphylaxis Reaction

Action Plan for School Bus

Control Measures

All children are to be informed that we have a student travelling on the bus with a severe nut allergy and children are not to have nuts on them before hopping on the bus. If children have eaten nuts before hopping the bus they need to have washed their hands. Bus driver to have an EPIPEN on the bus and have training in how to administer the EPIPEN.

Action Plan for a reaction on the school bus

1. Carry out first aid action plan.
 - Danger
 - Response
 - Send for help
 - Airway
 - Breathing
 - CPR
2. If it is an Anaphylaxis reaction. Get EPIPEN straight away and administer dose. Wait 5 minutes and administer another dose if necessary with another EPIPEN.
3. If dose is working, a positive response should be noticeable within minutes.
4. Call ambulance on 000.
5. Reassure the child. Contact parents:
 - Elizabeth Sporton. **Home Phone: 5349 7211 Mobile: 0427 836 583**
 - Peter Sporton. **Work Phone: 5342 6500 Mobile: 0447 535 453**
6. Reassure other children that Matilda is O.K.
